

PERGOLA DIVISION

CUSTOMIZE PERGOLA

GLOBAL ARCHITECTURAL INDUSTRIAL COMPANY

MADE IN SAUDI ARABIA

ABOUT GAICO

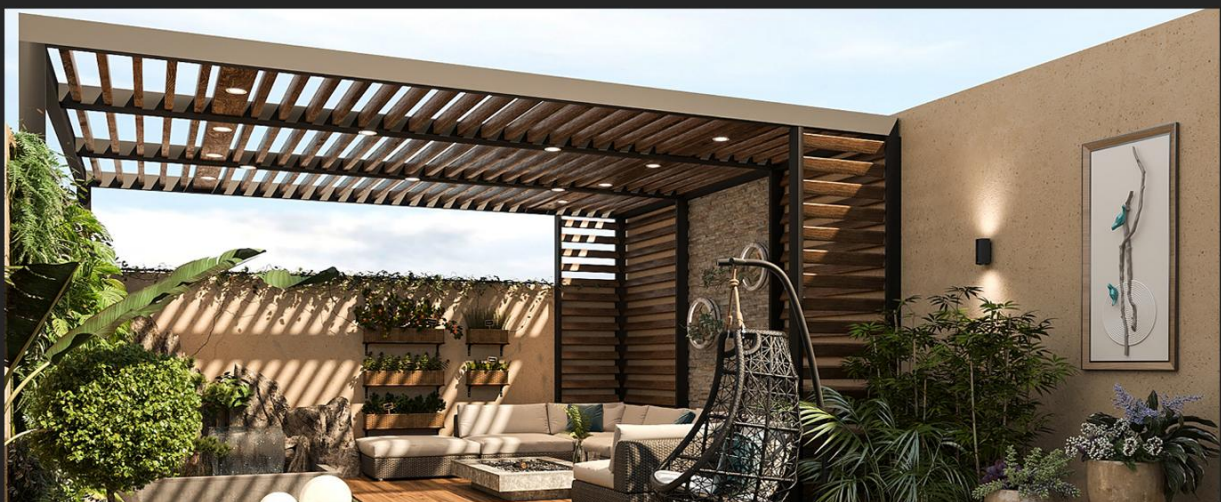

The Global Architectural Industrial Company (GAICO) has clearly made a mark in the business world, particularly in Saudi Arabia and in the Gulf Region for the last 30 years. One of the key priorities of the company from the outset, and even now, is to provide high quality products, exceptional services, and continuous awareness of the latest technologies that can support and keep our valued clients ever more comfortable and satisfied. Examples of some of our products include office partitions, movable partitions, toilets partitions, and several wooden products such as fire retied doors and, all aluminum products, and we are currently launching our very new and first outdoor product, namely, our **CUSTOMIZE PERGOLA**

WHY GAICO

GAICO Pergola brings outdoor living to new heights and provides the framework for your outdoor room. Offered in many standard and custom designs, GAICO provides architectural interest as well as the perfect amount of shade and privacy. with fixed or folding glass doors

- Design flexibility to fit your architectural style
- Manufactured of powder coted steel or aluminum
- Available in an array of standard colors or your custom color
- Customize GAICO Pergola making it one-of-a-kind
- Low maintenance, giving you more time to enjoy the outdoors

PERGOLAS FEATURES

- Easy installation, with three colors options, high-durable powder-coated steel or aluminum frame, and weather-resistant fabric makes this pergola an excellent choice for a lovely outdoor experience."
- Water-resistant folding glass door paired with an aluminum frame, comes in three different colors t while providing immense value for its price
- A pergola can be freestanding or attached to a building. It consists of at least four columns (or two columns and wall for attached designs) that support a latticework made up of beams, steel and stringers to create a shaded structure perfect , near a pool, on a deck or freestanding in an outdoor living space.
- The space underneath a pergola can be used to shelter an outdoor living or dining area, an outdoor kitchen or even a cocktail bar.

PERGOLAS COMPONENTS

- **COLUMNS** : These are the pillars that support the PERGOLA roof and often serve as a framework for outdoor living spaces. The number of pillars depends on the size of the pergola and whether it's free-standing or attached to a building.
- **BEAMS** : These are the slats that make up the PERGOLA open roof. The beams go on top of the columns,
- **FOLDING GLASS DOOR (optional)** : Each panel of the glass folding doors connects to the others and folds as they open—all within a single track. Folding glass walls are energy-efficient and offer wide, unobstructed openings that are not constrained by the fixed glass panels of a traditional slider.
