COMPANY INFORMATION

GLOBAL ARCHITECTURAL INDUSTRIAL Established in 1985 , involved in designing, manufacturing, and installing of different types of partitions like demountable office partition, movable (free standing), operable wall (moving wall), workstation, toilet partition, fire retied doors , furnitures , all aluminum products and several wooden products .

(GAICO) has clearly made a mark in the business world, particularly in Saudi Arabia and in the Gulf Region for the last 30 years.

One of the key priorities of the company from the outset , and even now, is to provide high quality products, exceptional engineering services, and continuous awareness of the latest technologies that can support and keep our valued clients ever more comfortable and satisfied .

Recently, we launched our engineering department specialized in designing interior spaces, of commercial or residential project , due to our long experience in the engineering field

SERVICES

we offers to our premium client the excellence of design combined with the highest quality service. interior Design is a service that was created to satisfy every type of request: not just private homes, but designs that create the world around what you want. Hotels, stores, infrastructures: creations that have in common uniqueness and the best quality to be found. our interior designers team create meaningful, lasting and beautiful environments that are entirely tailored to your needs.

SERVICES

We coordinate all aspects of your project from concept design to resolution stage. Efficient customer service, full supervision on site, adherence to budget and schedules, regular exchange of information with the client are the main elements of our service. We make sure that every step of the project is covered, making sure that the client, contractors and all other parties involved are well informed of every detail of the project.

SERVICES

Interior Designing is a unique fusion of art, architecture, and engineering. We always try to understand the Customer requirement and based on our Clients requirement we design and select the materials then we manufacturing and installation on site if needed . we have specialist installation teams supporting the unique fields of interior design. Each team has a specific set of skills required to support the installation requirements of your space . Our teams know that no matter how lovely the furniture, the built-ins and finishes must be installed for endurance as well as beauty.

We aim at thoroughly understanding client's taste and likes and transforming them into realistic on his space
