OFFICE WORKSTATION & WORKSPACE

SERVICES

WORKSTATION

- A workstation is an area where an individual performs daily work-related tasks. For example, in an office setting this might include a desk, writing area, computer, and storage area for documents. It is the purpose of the workstation to provide the user with space to carry out their typical work duties
- A workstation can include specialized equipment and tools that an employee requires to perform their job duties. These tools and equipment should be placed in an organized fashion within the workstation in order to make them readily accessible to the employee without an undue physical strain. This allows the employee to efficiently perform daily job duties faster and more efficiently.

- Consists of different physical objects such as furniture and office equipment. The perception of the individual workstation is dependent on both design features and location. These factors combined determine the employee's perception of different environmental factors at the workstation.

ACOUSTIC PANELS SYSTEM

ACOUSTIC PANELS SYSTEM

- Acoustic panels enhance the comfort and function of every space, whether residential or commercial. They absorb sound and create a superior atmosphere. Acoustical panels lessen overall sound in the room, filter any outside sounds around it, and remove any unwanted noise or background sound inside the room
- Acoustic panels are designed to absorb some sound waves and dampen the echoing or reverberation they can cause. They are placed throughout a office in specific, strategic spots to control the way sound waves bounce. and it can be used as decorative element in the office
- Acoustic panels are soft furnished use on walls or ceilings
- Many types of acoustic panels are available, including art, fabric-wrapped and perforated acoustic

COLLABORATIVE FURNITURE

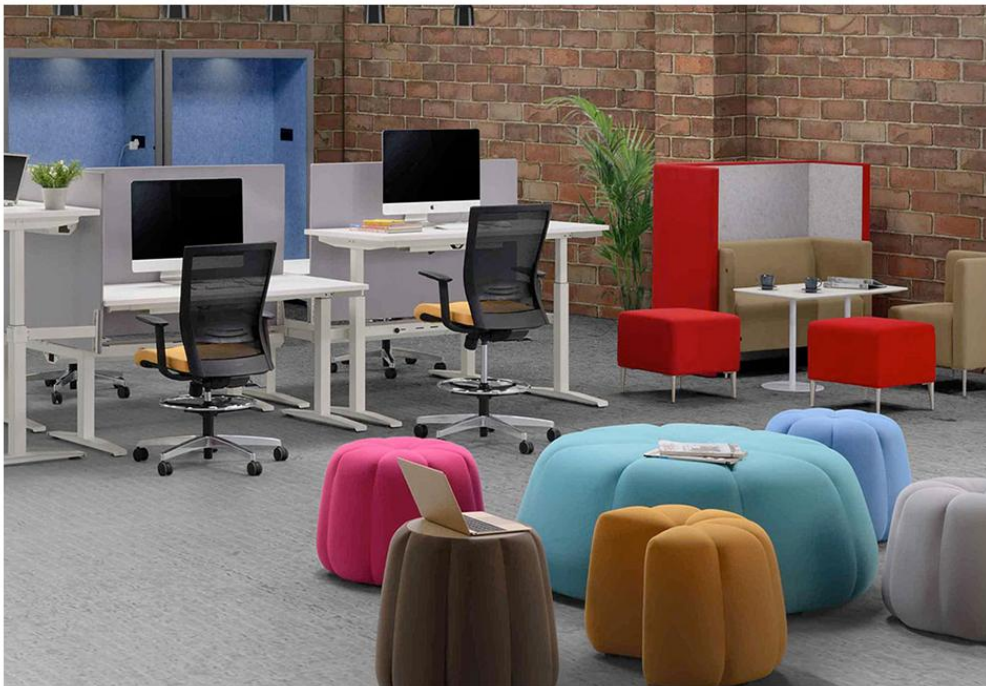

SERVICES

COLLABORATIVE FURNITURE

- Collaborative workspace furniture is, quite simply, office elegant furniture that encourages workforce collaboration.
- Well-designed, collaborative workspaces support teams in many ways. They invite innovation and spark discussion. They encourage the sharing of ideas and enable an active workspace, veritably bubbling over with excitement.
- collaborative seating will bring people together in a place where ideas, insight and inspiration can be shared. A modern design for today's collaborative, open plan, or any other commercial, education, government, healthcare or hospitality environment.

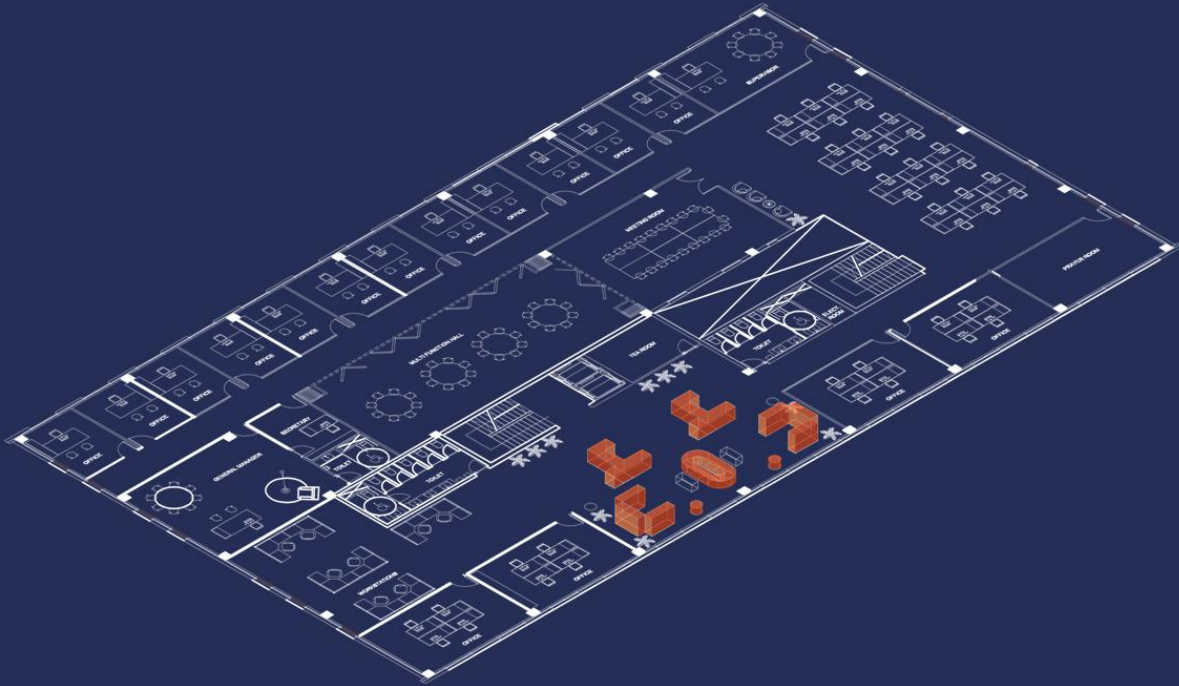

COLLABORATIVE

DESIGN & FEATURES

- Interlocking capabilities, quality construction and high traffic design deliver an endless array of curvilinear and rectilinear configurations.
- Different back heights available – Standard, High back and Extended back.
- collaborative meetings seatings available with a high upholstered screen surround, with the option of an extended privacy screen for acoustic insulation to minimise surrounding noise levels and The high sides, back and roof provide total privacy from the surrounding environment without the need for interior sub structures.
- Many seating units, benches and tables can be specified with power and USB outlets for mobile devices.

CUSTOMIZED FURNITURE

CUSTOMIZED FURNITURE

- Custom furniture is furniture that is made to your specifications and design by request.
- You can design the piece entirely on your own, or you can choose a style and decide on the details, such as materials like wood, stain, and fabric. Creating your own custom furniture is exciting, and a one-of-a-kind piece will add a unique sense of charm to your decor.
- Custom made furniture gives comfort that we decide on their dimensions, shape and all other parameters, thanks to which we match them perfectly.
- Custom made furniture gives comfort that we decide on their dimensions, shape and all other parameters, thanks to which we match them perfectly.

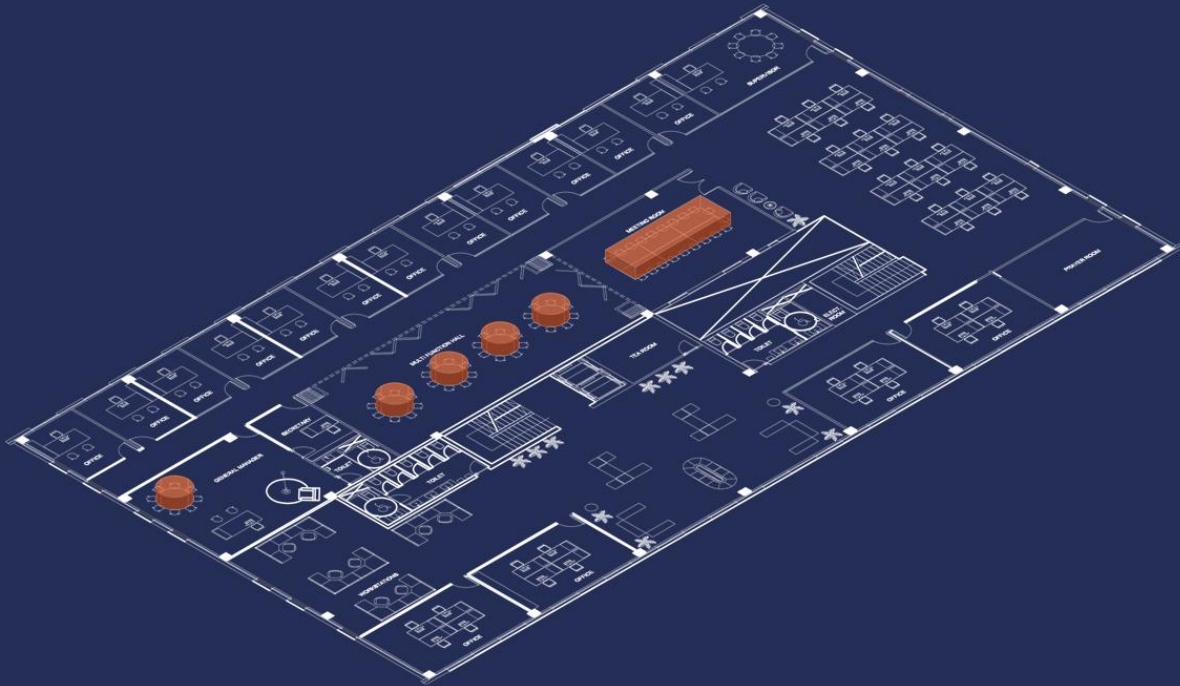

CUSTOMIZED

DESIGN & FEATURES

- Unique Style .One of the most significant plus points for interior designers or individual customers is that custom furniture can fit into their unique style. This can be applied in many different ways. For example, a company wants to ensure the interior design fits in with their brand, and customizing furniture can help them achieve their goal
- With us, you can visualize designs before they are built. We have a team of specialist designers who can come up with a 3D graphic of proposed furniture before the final go ahead. This brings two fundamental benefits. Firstly, you can easily make tweaks to the final design upon visualization and achieve the desired outcome. Secondly, by making those changes on a 3D model, it can save you significant costs and headache in the long run. It's essential in a bespoke project to get the design right, and with technology, we can ensure we get it right first time.

● INTERIOR DESIGN

INTERIOR DESIGN

SERVICES

INTERIOR DESIGN

- Interior design is the science of enhancing the interior of offices to achieve a healthier and more aesthetically pleasing environment for the people using the space.
- GAICO is a company that plans, researches, coordinates, and manages such enhancement projects.
- Engineering drawings are used to communicate design ideas and technical information to engineers and other professionals throughout the design process. An engineering drawing represents a complex three-dimensional object on a two-dimensional piece of paper or computer screen by a process called projection.

BENEFITS

- Interior design is a process that provides its customers with a set of aesthetically pleasing but efficient solutions for a better use of the space in question. The goal of interior design is to improve the user experience by better managing the space available in the intervened environment
- Make Spaces More Functional And Appealing
- Deliver The Latest Trends in office fit out world
